SPECIAL INSTRUCTIONS.

1 TWENTY THOUSAND POUNDS WILL CONSTITUTE A CAR LOAD; and where rates are made on articles in car load lots it must be understood to mean 20,000 pounds or more of each article named, except as otherwise specified in the classification, and the freight must be delivered on the same day, and all for one consignee.

2 When articles are shipped under a different name in order to deceive the carrier or to avoid this classification, agents at destination will collect freight according to proper classification; and in case of loss or damage consignees will be paid for the articles as called or shipped.

3 When a reduced rate is given on account of owner's assuming the risk, shippers must state on shipping order whether the freight is to be transported at owner's risk. When this is omitted the freight will be charged the highest rates and forwarded at carrier's risk.

4 Glass (plate or looking glass) over five and a half by seven feet will be received and carried only by special contract.

5 Green Beef Hides and Calf Skins, in bundles, will be billed at five (5) per cent. less than the actual weight when shipped,—this allowance being for shrinkage.

The following regulations will govern shipments of car load freight:

1 All cars must be correctly weighed, and freight charged upon the actual weight, except as otherwise specified in the classification.

2 Twenty thousand pounds will be the car load weight, and freight will be charged upon all excess up to twenty-six thousand pounds at proportionate rates. All excess over twenty-six thousand pounds must be charged at *double rates.*

3 All articles, except as othewise specified in the classification, will be taken at actual gross weight, without regard to weight given by shippers and inserted in bill of lading.
