NARRATIVE SUMMARY

During the first half of Fiscal Year 1971 the 1st Shore Party Battalion participated in a number of ship debarkations to include six LST's, two LSD's and two LPD's. These operations were in conjunction with KEYSTONE ROBIN, a program directing the Brigade's cognizance over the return, debarkation, and re-assignment of units from Vietnam.

A two week MOS training program was provided for the 4th Shore Party Battalion, USMCR, during the month of August. The agenda covered aspects of the Shore Party's organization, mission and included sufficient on the job training to ensure a comprehensive training program. On 19 October 1970 landing procedures and beach operations were reviewed for the Battalion's Officers and Staff NCO's during a week of formal training presented by a team from the Landing Force Training Command, Pacific.

On 21 December 1970, the 1st Shore Party Battalion published a bulletin directing the establishment at battalion level of a training and manpower management system. The administrative consolidation was in response to a projected decrease in manpower during the Third Quarter, FY-71. The Battalion's intent was to conserve personnel, continue reporting procedures in at least as effective a manner, and to reduce requirements on subordinate unit commanders.

Training in helicopter support operations continued for Brigade units as required during scheduled exercised.
