NARRATIVE SUMMARY

Due to interdiction of Highway 1 during the month of February, no convoys departed Supply Battalion for resupply north of Danang.

Helicopter support operations from the FLC, Red Beach helipad, which is operated by Supply Battalion personnel, increased during the month of February. 197 S/T of all classes of supply were lifted to units throughout the I Corps Area during the month. In addition, 474 S/T of ammunition were lifted from the ASP#1 helipad with the assistance of helicopter support teams from 1st Shore Party Battalion.

The M-16 Barrel Exchange Program continued during the month of February. The following accumulative data reflects total program performance through the end of February:

Barrels removed	2,180

Barrels installed	4,639
Receivers on hand w/o barrels	15,760
Total barrels installed to date	6,311

A special inventory team consisting of 26 NCO's, assigned TAD to FLC from various FMFPac units, completed Phase III of the Commanding General's Special Inventory Program on 24 February. Phase III of the Special Inventory Program consisted of verifying zero balances of stock items reflected as having valid RO on current CCP records.

TAB B of ENCL 2

Upon completion of the third phase of the special inventory program, this team was assigned, on 24 February, to assist in the rewarehousing of bin storage facilities in warehouse 35 of the Supply Battalion. Progress in the rewarehousing effort and the results obtained during the five day period ending 29 February far surpassed initial estimates and as a result, the teams TAD orders were extended from a termination date of 9 March 1968 to 21 March 1968. It is anticipated that this extension will permit completion of the rewarehousing of bin storage facilities in warehouse 35 by 17 April 1968, in lieu of the previous estimate of 1 June 1968.

The overall rewarehousing effort in Warehouse 35 for the month of February was as follows:

Supply Battalion has been assigned the responsibility for the operation and control of an in-country Repair/Rebuild Control Center (R/RCC). This program requires the battalion to control the physical receipt, storage, shipping and issuing of specific program repair/rebuild assets, to include monitoring the asset location while out-of-country. The R/RCC is presently in the process of being established and will be physically located across the road from Marine Air Freight, Danang Air Field. All personnel and equipment for operation of the R/RCC have not been received. Thus, full operational status not anticipated until the first part of April 1968.
