SECRETINTELLIGENCE

1. Enemy Situation at the Beginning of the Period. The only confirmed unit in the vicinity of our TAOR was the P-18 Local Force Company located at vicinity of (YD 789076). The strength of this company averaged eighty-five personnel. There were numerous reports of an unidentified battalion in the vicinity of (YD 755107) but this was never confirmed.

2. Enemy Incidents During the Period.

a. 011930 Dec. Company M, 1st Platoon in ambush vicinity (YD 814183) sighted 6 man VC patrol which came to left flank of ambush. Marines and Popular Forces opened fire on VC. VC did not return fire. Two rounds of illumination were fired by artillery. Two Marines and 4 PF's observed 2 VC fall into rice paddy. A thorough search of the area was made, but the bodies were gone. Marines pulled back temporarily from ambush site and then started combat patrol. As patrol was going back in vicinity of ambush site they saw at 012145H approximately 6 VC moving east towards patrol on railroad tracks. Marines fired on VC and VC turned around and ran in a westerly direction. Search was made of area and the following was found: 1 Chicom 7.62 Carbine, 1 bottle cough medicine, 1 bottle quinine, 1 tin box with medicine, 2 tubes of aspirin, 1 small bottle alcohol, 4 M-26 grenades, 1 poncho, 1 carbine magazine pouch, 1 pouch (unknown) and 3 7.62 shells.

b. 012130 Dec. Combined Action Company-4 sighted 3 to 4 VC vicinity (YD 926107). CAC-4 fired and VC moved in southeast direction. Negative results.

c. 032115 Dec. Company M, 2nd Platoon, while in ambush vicinity (YD 908089) spotted 15 to 25 VC in a very close column moving north carrying small arms. Approximately 15 VC passed ambush position when Marines opened fire, but VC did not return fire but dispersed in many directions. Five VC came on left flank of ambush and left flank opened fire on them. VC, after being fired upon moved north along river bank. Patrol from ambush was sent to search killing zone with negative results. 2nd Platoon, Company M moved 25 to 30 yards, spotted 2 VC believed to be looking for weapons or bodies. Marines opened fire upon VC, VC fled east. The following morning a search was conducted and the following was found: 1 Chicom 7.62 Carbine, 3 long stem frag grenades, 1 canteen pouch and 1087 pisatres. One Marine moved to check brush, spotted 1 VC WIA trying to pull string of grenade, Marine opened fire on the VC, result 1 VC KIA. Platoon leader stated that signs indicated that 7 to 10 bodies were dragged off in a northerly direction.

d. 032215 Dec. Company M, 2 Alpha, while in ambush vicinity (YD 908089) right flank spotted 1 VC trying to cross in front of their position. Marines and VC spotted each other approximately at the same moment. Marines opened fire and VC disappeared.

SECRETCOMMUNICATION-ELECTRONICS

1. It is recommended that limited third echelon parts such as battery plugs for PRC-6, AFC stages, battery cables for PRC-10 and switches for PRC-6 be authorized for battalions in order to keep the communications equipment deadline percentage down. The AN/URM-48 Signal Generator and the AN/PSM4 multimeter are sufficient to handle the increased capability.

2. In order to provide a base camp with the necessary power that is required, a heavy duty, high output, continuous operating diesel generator of 30KW capability is needed, along with a sufficient amount of heavy duty electrical wire, about 10,000 feet.

3. Guerrilla Warfare also brings about the necessity to dispatch a technician to outlying companies that are divorced from a base camp. In order for the technician to diagnose trouble and make on the spot repairs, an increase of one (1) AN/USM15 is required.

4. A problem that also arose, particularly in the rainy season, was the need of protecting the radios. Each company was issued an ample supply of waterproof bags. However, the line companies were reluctant to use these bags, because the "whitish" color would give away their ambush and patrol positions and pin-point the units CP group. A green or camouflaged bag, with a non-reflective surface, would be ideal in place of the white, CW-436 and CW-437 bags, that are now in use.

ARTILLERY

## 1. Significant Events:

(a) Numerous artillery missions were fired at actual and suspected VC targets. ARVN operations also received support from artillery fires. Many illumination shells helped to spot and destroy the enemy.

(b) The 4th Battalion, 12th Marines continued conducting a busy schedule for readiness with both day and night displacements for its units. These displacements enabled fires to be placed at a greater range outside the TAOR on suspected VC positions or targets of opportunity. During one operation all of the units displaced simultaneously. Battery "M" moved one platoon of guns forward, Battery "I" took two platoons out, and Whiskey Battery displaced entirely. These forward units fired, massing fires, reinforcing fires, TOT's, and registrations. Each Battery had its own FDC accompanying it, and, in addition, the Battalion FDC was also in the field.

(c) Battery "I" and Whiskey Battery embarked from Viet Nam with BLT 3/4. Battery "I" had fired 18,688 rounds in combat missions since its arrival in the Republic on the 14th of April 1965.

(d) The Forward Observer for Lima Company and his FO Team were riding in a vehicle near the Vietnamese hospital in Gia Le Thuong when a mine was detonated. Although no one in the team was injured, the driver of the vehicle sustained serious injuries to his foot.

(e) The Forward Observer for India Company accompanied his unit, with his FO Team, to Hill 41, a combat outpost south of Da Nang, and called in two illumination and two HE missions on advancing VC targets during his stay.

## 2. Artillery Units:

Battery "M", 4/12  
 Battery "I", 3/12  
 Battery "W", 2/12  
 Hq Battery, 4/12

## 3. Naval Gunfire:

(a) The Naval Gunfire Spot Team journeyed to the village of Thang Binh, south of Da Nang, to lend a hand for Operation Harvest Moon. They helped provide "Security" for the ARVN/American Advisors Command Post.

4. Types of missions fired:

Batteries "M", "I", and "W" fired Unobserved Missions on suspected enemy positions as well as on H&I targets. Observed Missions were fired on actual targets and suspected sites. Registrations and Service Practice Shoots were conducted by each Battery, and a Demonstration was ~~put forth~~ *given* for ARVN soldiers in the area.

4. Date of Arrival: 14 April 1965
5. List of Logistic Units enroute from POE: N/A
6. Supply and Distribution

a. General Status. The status of supply for this command is considered to be very good, with the exception of certain problem areas listed below:

b. Arrival of Criti-Pak shipments of supplies during the period of this report has been instrumental in improving the supply support capabilities of this command.

c. Significant problem areas.

(1) As stated in previous reports, shortage of typewriters is still considered to be a major supply problem area. Of the eight (8) typewriters on valid requisition, none have been received to date.

(2) Unavailability of SLIT cards (NAVMC 10493-SD) has created a problem, since this is the required document used to introduce supply demands into the supply system. Since arrival of this battalion in Vietnam, SLIT cards have been in critically short supply on three separate occasions.

(3) Some members of this command are still without such items of individual equipment as air mattresses, knife, fork, spoon, canteen cups, and in many cases do not have sufficient M-14 ammo pouches to house their required basic allowance of ammunition. Some of these items have been on priority 05 requisition since April 1965.

(4) Outstanding Requisitions.

7. Maintenancea. General Status.

(1) Electronics. The general status of equipment is reaching the critical stage. More than 40% of our T/E of both types of radios AN/PRC-6 and AN/PRC-10 are in FLSU #2 for repair. Deadlining of radios at second echelon for tubes is becoming prevalent.

(2) Ordnance. The general status is good at this time. Outstanding documents for replacement items still exist. These are for two M-60 Machine Guns and three M-79 Grenade Launchers.

(3) Motor Transport. General status is fair with exception of certain problem areas listed below.

b. Significant Problem Areas

(1) Electronics. Seemingly small problems have now become acute. Splices have to go untaped because there is no electrical tape available. Due to shortage of tubes radios cannot be checked. Only two BB-451's are left, the remainder of which have been used to the point of unserviceable. A sufficient amount of BB-451's are on requisition, but have not been received. Wireman tools, TE-33, remain a large demand item. If parts for radios are not received shortly, operational commitments will have to be curtailed considerably. Combat Essential Equipment on deadline is as follows:

AN/MRC-83	2
AN/TPS-21	1
AN/PRC-41	1
AN/GCC-3	1
TT-297	1
AN/PRC-6	19
AN/PRC-10	14

(2) Ordnance. Windage knobs and hand guards for the M-14 rifle, bolt plugs for the M-60 Machine Gun, magazines for the .45 Cal. pistol, lubricating oil and bore cleaner are problem items. Combat Essential Equipment deadlined is as follows:

Gren Launcher	6
M-60 Machine Gun	4

Enclosure (1)

CONFIDENTIAL

60mm Mortar 1

(3) Motor Transport. Brake shoes and wheel cylinders for the M-422 are the main problem areas, other areas remain as previously reported. Dead-lined Combat Essential Equipment is as follows:

M-274 Mule 10  
M-422 Mite 7

8. Development of Logistic Units. N/A

9. Base Development. Base development is progressing at a rapid rate. Strongbacking is 85% complete and could be 100% complete if adequate tentage was available. Construction of the Battalions 500 man standard galley has begun with an estimated completion date of 15 January 1966. The lack of an adequate water source for Marine units in this enclave is a continuous problem. CO 3dBn, 4th Mar letter 4/rjw over 4235 of 8 December 1965 was submitted to the Commanding General, 3d Marine Division setting forth the background and recommendations on this subject.

10. Organic Engineer Projects. Construction of strongbacks, heads and road maintenance.

11. Medical

a. General Status. Medical status is considered good.

b. Evacuation. 4 personnel have been evacuated since last reporting period

c. Significant Problem Areas.

(1) Medical Supplies - Shortages are on order.

(2) Organic Supply - Adequate with the exception of battle dressing for "jungle kits" and sanitation supplies.

12. Embarkation. N/A.

13. Port Operations. N/A.

14. Advance Planning.

a. A team from this unit conducted a liaison visit from 28 November to 1 December with 1st Marine Division, 3d Force Service Regiment and 1st Service Battalion representatives, concerning the rotation of the 3d Battalion, 4th Marines to Okinawa.

## Annex D (Debarcation) To Embarkation Plan 401-65

Time Zone: I (Upon Arrival Point of Debarcation)

1. General

- a. Debarcation will commence on order of CTG 76.7 upon arrival in Okinawa.
- b. Sketches of the primary routes of march on Okinawa and of the White Beach area are included as Appendixes 1 and 2 to this Annex.

2. Advance Partiesa. Advance parties will:

- (1) Make arrangements for debarcation and inform BLT 3/4 by message of any significant events which would effect debarcation.
- (2) Arrange for transportation of troops and equipment to respective camps.
- (3) Make liaison with 3rd FSR and 1st Service Battalion to pick up vehicles and equipment requiring third and fourth echelon repair.
- (4) Coordinate the timely arrival at POD of representatives from the parent organizations of the units attached to BLT 3/4.
- (5) Construct signs to indicate where units/vehicles/cargo should stage for further transportation to respective camps.
- (6) Provide guides from POD to camps.

3. Debarking Unitsa. Troops

- (1) One representative from each major unit to debar (Company, Battery, Attachment or Detachment) report to Embarkation Control point (Appendix 2) immediately upon arrival debarcation area to coordinate transportation requirements. Reporting individual must know the number of personnel and amounts and types of supplies requiring transportation.
- (2) Debarking troops must not become detached from their packs and seabags. If conditions permit, troops will be loaded immediately on trucks with their gear stacked in an attached trailer. This will minimize troop baggage "losses".

b. Vehicles

- (1) Operable vehicles will be offloaded and formed into convoys at points to be established by the advance party.

CONFIDENTIAL

CONFIDENTIAL

1. Nothing of significance to report concerning Air Defense during December 1965.

SECRETCOMBAT AIR SUPPORT

1. HELICOPTER. Inclement weather greatly curtailed Helicopter Support Operations during December 1965. Because of the inclement weather, only an average of approximately one hour per day was flown in support of the Battalion. The support flown, included outpost resupply, reconnaissance flights, airborne Hunter-Killer flights, and small unit lifts. There were no noteworthy events concerning Helicopter Support during December.

2. CLOSE AIR SUPPORT. There were no close air support missions flown in support of the Battalion during December.

SECRETMEDICAL AND DENTAL SUPPORT1. SIGNIFICANT EVENTS

a. Ten B.A.S. Personnel were helilifted to ships on 22 December 1965.

b. On 23 December 1965 the B.A.S. personnel completed packing all supplies and records for embarking for Okinawa. Remaining medical supplies, including Morphine Syrettes, were turned over to the Medical Officer of 2nd Battalion 1st Marines with an inventory of the same.

c. The remainder of B.A.S. personnel were helilifted aboard ship on the afternoon of 23 December 1965.

d. On 25 December 1965 the advance party of which two Hospital Corpsman were attached, left by air and arrived in Okinawa 26 December 1965. They drew Sick-Call supplies to be used by the main body, which later landed on White Beach, and then proceeded to Camp Hansen on 29 December 1965 and set up new B.A.S.

e. On 30 December 1965 the B.A.S. received Medical Block and placed it in storage.

f. There were two medical cases that required admitting while aboard ship. One inguinal hernia repair case and one Punji-stick wound case who later came down with measles. Surgical repair of the former was performed on board ship. Both cases were released to duty by 1 Jan 66. There was a moderate increase of foot infections mostly fungi, as a result of the people coming up from the Chu Lai area of operations.

2. MEDICAL TRENDS

a. A maximum effort by all hands to cure all fungi and parasitic infections present or believed to be present in persons returning to the Republic of Vietnam.

b. An intensification on lectures to medical and non-medical personnel alike on first-aid, malaria, V.D., hygiene and sanitation, and lessons learned in RVN prior to deployment.

c. A special lecture to all corpsman pertaining to heli-evacuations and advanced first aid.

ENCLOSURE 15SECRET

SECRET

d. Full utilization of the four week course on the Vietnamese language, 2 MedCAP corpsman assigned.

3. BATTLE CASUALTIES

a. All these were treated by A Co., 3rd Medical Battalion.

4. NON-BATTLE CASUALTIES

a. Nine cases were reported for the month of December 1965.

5. PREVENTIVE MEDICINE

a. Twelve new urinals were ordered to be built by "A" Engineers for installation throughout the Battalion area at Hue, Phu Bai, RVN.

b. Ten basket type rat traps were ordered from a civilian store. These weren't ready before the Battalion embarked, However the relieving medical department was informed of this.

c. Twenty-two rodents were caught during the month, from 1 Dec to 12 Dec 1965.

d. A new five-hundred man galley and mess-hall and three new showers were under construction prior to leaving the Hue, Phu Bai area.

6. CIVIL AFFAIRS RENDERED

a. All records of patients treated, medications (by type), and schooling conducted were reviewed with and turned over to the relieving Medical Department, 2nd Battalion 1st Marines, prior to departure of 3rd Battalion 4th Marines.

7. PROBLEM AREAS

a. The Battalion Ambulance continues in a deadline status. Also the lack of a typewriter for the B.A.S. has created many difficulties when trying to maintain Health and service records. Both of these deficiencies should be rectified prior to BLT 3/4 returning to RVN.
