S-1 Chronology

1. General. The personnel situation is rapidly becoming critical. The battalion is presently short 12 officers and 111 enlisted personnel, with shortages primarily in Occupational Field 03. Losses anticipated during the forthcoming month will further compound this problem, since the battalion is scheduled to lose 2 officers and 162 enlisted personnel through rotation. In addition, the battalion has 4 officers who will be evacuated to CONUS. It is estimated that a large number of the enlisted personnel will be evacuated to CONUS. Officer and enlisted replacements are urgently required.

a. Strength. The average monthly strength for the period ending 31 July 1967 was as follows:

<u>USMC</u>		<u>USN</u>	
<u>OFF</u>	<u>ENL</u>	<u>OFF</u>	<u>ENL</u>
33	1064	2	58

(1) Percentage of T/O strength was 93%.

b. Losses

	<u>USMC</u>		<u>USN</u>	
	<u>OFF</u>	<u>ENL</u>	<u>OFF</u>	<u>ENL</u>
Hostile	10	301	2	27
Non-Hostile	2	40	0	1
Admin	6	44	0	17

(1) Of the hostile casualties, 28 were KIA's and 312 were WIA's. Of the WIA's, 47 were transferred by service records, 141 returned to duty and 124 remain hospitalized.

(2) Of the 43 non-hostile casualties, 1 was killed, 15 were transferred by service records, 3 returned to duty and 24 remain hospitalized.

(3) Three officers and 34 enlisted personnel rotated to CONUS. Three officers and 11 enlisted personnel were transferred within WESTPAC. Transfer percentage was 3%. Two USN enlisted personnel rotated to CONUS and 15 were transferred intra-Division.

c. Replacements. This Command joined nine USMC officers, 136 USMC enlisted personnel and 18 USN enlisted personnel.

d. Administration:

(1) State of Moral. Moral remains outstanding.

(2) Significant Activities or Personnel Service. Due to operational commitments, very limited special services activities were conducted

(3) A total of 46 personnel were promoted; two to Private First Class and 44 to Corporal.

1. General. During this period from 1 to 31 July, the 2d Battalion, 9th Marines participated in four offensive operations against Communist Insurgent Forces under the operational control of the 9th Marine Regiment. From 1 to 9 July, the battalion was assigned the mission of security for the forward artillery encampment at Cam Lo (YD 144616). This mission carried with it the responsibility for security of the Cam Lo bridge (YD 148604), and the MSR running north from Cam Lo (YD 148604) to the forward Marine outpost at Con Thien (YD 116701). Also included in the mission was the task of securing the area generally bordering the MSR, with emphasis on the eastern side of the road. These missions were accomplished through the use of several company and platoon patrol bases, making maximum use of aggressive small unit patrolling and ambushing. Numerous small unit search and destroy missions were conducted in conjunction with this mission. On 9 July, the battalion relieved the 3d Battalion 9th Marines established a strong point at vicinity (YD 133702) and conducting aggressive small unit activities in the zone of action in support of Operation Buffalo, Hickory II, and Kingfisher. The battalion remained in this general operating area until 27 July, when it embarked on a mission to North west of the outpost at Con Thien (YD 116701). On 28 July, the battalion moved to the vicinity of Thon Cam Son (YD 086753), in the Demilitarized Zone. On 30 July, following a significant enemy contact on 29 July, the battalion established a position in the vicinity of (YD 100594) providing local security and small unit ambushes and patrols.

2. Area.

a. The area of operation, excepting the movement into the Demilitarized Zone, was bounded on the north by the most prominent terrain feature in the area, "THE TRACE", a strip of cleared land approximately six hundred meters wide running from the Marine outpost at Con Thien (YD 116701) to the forward artillery position at Gio Linh (YD 213732). The area was bounded on the east by the 17 North-South grid line, the South by a line generally along the 62 East-West grid line and on the West by the MSR, running from Cam Lo (YD 144616) to Con Thien (YD 116701). The area is predominantly low rolling hills with piedmont-type vegetation, broken by small streams and covered with a network of trails. The northern portion, just south of "THE TRACE" contains deserted and destroyed villages and a former agricultural area, broken by thick hedge-rows and treelines. The nature of the terrain to the North of "THE TRACE" was hilly and heavily vegetated with visibility in these areas limited to about 5 meters. A canopy of 10 to 15 feet is dominant in the area, which is also broken up by open areas and former agricultural areas (rice paddies). There are few trails, but those that do exist are very prominent. The area is marked by a dominant terrain feature, the medium service road running from North to South (YD 085753 to YD 097705).

b. Movement in and throughout the operating area is generally good to excellent. The MSR and an extensive network of trails mark the area. A large portion of the area is piedmont area and suitable for movement without trails. Those dense areas which limit movement usually afford trails to facilitate movement. The movement into Southern portion of the Demilitarized Zone was canalized along the road (YD 097705 to 085753) due to heavy vegetation bordering the route.

c. During the month of July, weather was generally good for operations throughout the area. A weather summary for the period 1-31 July, is as follows:

Maximum Temperature - 95
 Minimum Temperature - 75
 Number of days with rain - 6 to 10 days
 Total rainfall received - 10 inches
 Average winds - 8 to 13 knots
 Visibility - 12 miles

3. Enemy Situation

a. General. Following Operation Hickory I, a buildup of equipment and personnel took place in and north of the Demilitarized Zone. The major units posing a threat were the 31st, 803rd, 812th, and 90th Regiments of the 324 B Division of the North Vietnamese Army. Characteristics of these units are well-fed, well-supplied, aggressive troops, reinforced with artillery, rockets, anti-aircraft guns, and surface-to-air missiles.

b. The period from 1 to 29 July, was marked by minor contacts with enemy units. Due to heavy losses incurred on Operation Hickory I, and later on Operation Buffalo, involving other USMC units, the enemy abstained from major contacts. Significant events during this period were the almost daily artillery and mortar attacks on the Con Thien outpost, and surrounding friendly units (vic YD 116701). The primary mission of these units to the north of Con Thien was to continue the harrasing and interdicting fires, while continuing small unit activity to harass units available for support of Con Thien, by mining the MSR and other prominent trails, and occasionally conducting small mortar attacks on friendly positions along the road. These small units posed a threat to the battalion perimeter at Cam Lo and the Cam Lo bridge, but no significant contact was made in that vicinity. The major events during this period was the encounter with a sizable enemy force on the movement south from Thon Cam Son in the southern portion of the Demilitarized Zone. This action took place throughout the day of 29 July. The enemy contacted during this period were believed to be of the 803rd Regiment, 324 B Division, North Vietnamese Army. Uniforms sighted during the action were typical khaki NVA uniforms, supplemented with other clothing such as camouflaged utilities much like those worn by ARVN Units. There was one sighting of a NVA in a flak jacket and utilities plus helmet, probably gathered from previous contacts with USMC units. The enemy was well-equipped with automatic and crew-served weapons, the Soviet semi-automatic SKS, and the U.S. M-1 and M-2 carbine. Other sightings also showed evidence of the enemy using U.S. M-14 rifles and one sighting of an M-16. Typical crew-served weapons employed were the Soviet 12.7mm anti-air machine gun, the RPG-2, 57mm and 75mm recoilless rifles, and 60mm and 82mm mortars. The enemy did not use his artillery capability and no evidence of gas being used was detected during the contact. The enemy was well supplied with ammunition, both small arms, RPG's and mortars. Since this unit had been out of major contact with USMC units for some time it is believed that in this time he was able to build a strong, well-disciplined, well-supplied fighting force. From the nature of the deployment of enemy forces, it is certain he had a good communication system.

Actual sightings of the enemy were few due to the nature of the terrain and the enemy's use of camouflaged positions and individual camouflage. Enemy bodies found were stripped of clothing and gear. The enemy during the battle were very aggressive and determined, as indicated when one NVA charged a Marine with an axe. It is believed the mission of this enemy force was to isolate the battalion, separate the column and then destroy it as an initial phase in the long sought after victory over the forward Marine outpost at Con Thien. His concept of operation was to conduct ambushes at several strong points, utilizing terrain features to his advantage. At these sites the enemy had pre-registered mortar concentrations. In all cases the strong points were covered by intense automatic weapons fire.

ANNEX C

Site of the strong points were (YD 085745), (YD084739), (YD 087733), the latter being a company sized ambush site. He also employed command detonated claymore mines, which were used as triggering signals for all the ambushes to open fire and for mortars to commence. It is believed that the enemy outposted the road on the movement to the north, then slipped into position early in the morning on 29 July, from assembly areas to the west, probably near the Ben Hai River.

8. Surveillance Devices. During the first nine days of the month 1 AN/TPS-21 was utilized extensively. At this time however, both AN/TPS-21, assigned to this battalion are under repair and awaiting parts unavailable at this time. In addition, 5 SIDS were utilized on the battalion perimeter out of the 16 assigned to this unit. All other are deadlined due to a lack of repair parts which are on order (Priority 2). In addition 5 W.P. site-infrared were employed most of the time.

9. Psychological Operations. Psychological operations efforts during this reporting period were directed and coordinated by the S-5 of the 9th Marines. However, entertainment in the form of a Marine Talent Show was provided for the villagers of Cam Lo, on several occasions. This show was considered a success.

10. Comments and Conclusions. Through aggressive actions, the enemy was kept off balance throughout the reporting period. His small unit actions were curtailed a great deal by the movement of this battalion. The movement into the Demilitarized Zone broke up what appeared to be a major build-up and another attempt at a ground attack on Con Thien. Danger areas in this area of operation are the outpost at Con Thien, still under constant threat of enemy bombardment and attack, and the strategic MSR and Cam Lo Bridge, both vital to the resupply of units operating in this area. Operations in general during this reporting period seemed to limit the enemy to reckless tactics leading to his destruction.

UNCLASSIFIED

1. General. From 010001 July to 021000 July 1967, 2d Battalion, 9th Marines participated in Operation Cimarron in accordance with 9th Marines OpnO 7-67. From 021000 July to 140900 July 1967, 2d Battalion, 9th Marines participated in Operation Buffalo in accordance with 9th Marines OpnO 10-67. From 140900 to 161600 July 1967, 2d Battalion, 9th Marines participated in Operation Hickory II in accordance with 9th Marines OpnO 11-67. From 161600 to 312400 July 1967, 2d Battalion, 9th Marines participated in Operation Kingfisher, in accordance with 9th Marines OpnO 12-67. From 1 July to 8 July 1967, 2d Battalion, 9th Marines provided security for the forward artillery position at Cam Lo (vic YD 147617), the Cam Lo Bridge (vic YD 149605), and provided security for the engineer sweep team on the MSR, provided security for convoys on the MSR; maintained an active ground surveillance program; conducted spoiling attacks in the assigned OA; and provided a counter-attack force for the Cam Lo Resettlement Area. On 9 July 1967, 2d Battalion, 9th Marines moved to (vic YD 133702), relieved the 3d Battalion, 9th Marines and assumed the mission of attacking in the assigned zone to locate and destroy enemy forces, supplies and equipment. On 14 July 1967, 2d Battalion, 9th Marines established a blocking position (vic YD 133702), and was prepared to provide a Command Group and 2 companies as a regimental reserve. From 16 to 27 July 1967, 2d Battalion, 9th Marines conducted patrols and ambushes in their designated OA. From 28 to 31 July 1967, 2d Battalion, 9th Marines conducted a spoiling attack into the DMZ and returned, in accordance with 9th Marines FragO 2 for Operation Kingfisher.
2. Company "E", 2d Battalion, 9th Marines. From 1 to 8 July 1967, Company "E" provided security for the artillery position at Cam Lo (vic YD 144616). On 9 July 1967, Company "E" reported for OpCon to 3d Battalion, 9th Marines with the mission of providing security for the artillery position at Cam Lo. On 10 July 1967, Company "E" returned OpCon of 2d Battalion, 9th Marines and moved to (vic YD 140697), as part of the perimeter at that position. Company "E" stayed in the same general area with no change of mission until 27 July 1967. On the night of 27 July 1967, Company "E" moved to (vic YD 102690) and prepared to take part in a spoiling attack into the DMZ. On 28 July, Company "E" moved on the right flank of the axis of advance, moving to a night position (vic YD 085750). On 29 July 1967, Company "E" led the rest of the battalion out of the DMZ to a night position (vic YD 097704). On 30 July 1967, Company "E" moved back to assembly area (vic YD 100693) where they stayed until the end of July.
3. Company "F", 2d Battalion, 9th Marines. On 1 July 1967, Company "F" moved to (vic YD 136668) and set up a CPB to provide security for the MSR. Company "F" continued this mission and operated out of this patrol base until 9 July 1967, when Company "F" moved to (vic YD 132704) and set up as part of the battalion perimeter. From 7 to 9 July 1967, Company "F" was the reserve company for 3d Battalion, 9th Marines. Company "F" stayed (vic YD 132704) until 14 July 1967, when they moved to (vic YD 133702) as part of a battalion blocking position. Company "F" stayed in this position until 19 July 1967, when they moved to (vic YD 146678) and established a CPB, providing security for the MSR. Company "F" stayed in that area until 26 July 1967, when they returned to (vic YD 133702) to prepare to go on a spoiling attack with the rest of the battalion. On the night of 27 July 1967, Company "F" moved to (vic YD 102690), and stayed there until the following morning, when Company "F" was helo-lifted to (vic YD 085747). On the night of 28 July 1967, Company "F" established their night position at (vic YD 082745). On 29 July 1967, Company "F" started the return south behind Company "H" and moved to a night position (vic YD 088735). On 30 July 1967, Company "F" moved back to an assembly area (vic YD 100693), and remained there until the end of the month.

4. Company "G", 2d Battalion, 9th Marines. From 1 to 8 July 1967, Company "G" provided security for the Cam Lo Bridge (vic YD 144608), and the out-post on Hill #30 (vic YD 140614), as well as providing the reaction force for the Cam Lo Resettlement Area. On 3 July 1967, Company "G" also assumed the Sparrow Hawk Reaction Force, and continued with this responsibility until 8 July 1967. On 9 July 1967, Company "G" moved to (vic YD 135704) as part of the battalion perimeter, and stayed in this vicinity until 22 July 1967. On 22 July 1967, Company "G" moved to (vic YD 168682) and set up a CPB. Company "G" continued this independent operation until 24 July 1967, when they returned to (vic YD 138706) and assumed responsibility for part of the perimeter. Company "G" remained in this position until the night of 27 July 1967, when Company "G" moved to (vic YD 102690) with the rest of the battalion. Company "G" moved out the following morning as part of a spoiling attack into the DMZ, moving on the left flank of the axis of advance. Company "G" moved to their night position on 28 July 1967 in the (vic YD 083757). On 29 July 1967, Company "G" moved out behind Company "F" in the move back out of the DMZ, arriving at their night position at (vic YD 087745). On 30 July 1967, Company "G" moved to an assembly area (vic YD 102690), and stayed in that position until the end of the month.

5. Company "H", 2d Battalion, 9th Marines. On 1 July 1967, Company "H" prepared to move out and establish a CPB. On 2 July 1967, Company "H" moved out, establishing a CPB at (vic YD 135666). Company "H" continued this operation until 6 July 1967, when they reported for OpCon to the 3d Battalion, 9th Marines. On 9 July 1967, Company "H" was released to 2d Battalion, 9th Marines and assumed responsibility for part of the perimeter at (vic YD 135695). Company "H" remained in this position, with the same mission, until 19 July 1967, when they moved to (vic YD 131698) to take part in a combined action search and destroy operation (vic YD 150682) on 20 and 21 July 1967, under OpCon of the 9th Marines. On 22 July 1967, Company "H" returned OpCon to 2d Battalion, 9th Marines, and returned to (vic YD 135704) and assumed responsibility for part of the perimeter. Company "H" remained in this position until the night of 27 July 1967, when they moved out to (vic YD 102690) with the rest of the battalion. On 28 July 1967, Company "H" moved out in the middle of the axis of advance as part of a spoiling attack into the DMZ. Company "H"'s night position on 28 July 1967, was (vic YD 086754). On 29 July 1967, on the move south out of the DMZ, Company "H" followed Company "E", and moved to their night position (vic YD 088735). On 30 July 1967, Company "H" returned to the assembly area (vic YD 102690), and remained here until the end of the month.

6. H&S Company, 2d Battalion, 9th Marines. From 1 to 9 July 1967, H&S Company stayed at the Cam Lo forward artillery position (vic YD 144616). From 9 July to 27 July 1967, H&S Company was in position in (vic YD 135704). On the night of 27 July 1967, H&S Company moved to (vic YD 102690) with the rest of the battalion. On 28 July 1967, H&S Company took part in a spoiling attack into the DMZ, moving to their night position at (vic YD 086754). On 29 July 1967, H&S Company moved back south, to a night position in (vic YD 088735). On 30 July 1967, H&S Company returned to the assembly area (vic YD 102690) and remained in the same area until the end of the month.

7. Close Combat.

a. Patrol Breakdown. During the month of July 1967, 2d Battalion, 9th Marines provided 36 squad patrols and 41 platoon patrols, plus 141 squad ambushes and 3 platoon ambushes.

b. Sparrow Hawk. During the month of July 1967, while 2d Battalion, 9th Marines had Sparrow Hawk Reaction Force, Sparrow Hawk was never utilized.

8. Training. Operational commitments precluded formal military training which normally would have been accomplished. During July 1967, 2d Battalion, 9th Marines joined 149 replacement personnel that received training in accordance with Division Order 1510.3A.

9. Fire Support and Fire Support Coordination.

a. 2d Battalion, 9th Marines was provided direct artillery support by Battery "F" 2d Battalion, 12th Marines (1-14 July) and by Battery "E", 2d Battalion, 12th Marines (15-31 July). General support during the period 1 July to 31 July was provided by Battery "K", 4th Battalion, 12th Marines (155mm S.P.) and 1st Provisional 8" Howitzer Battery. Tactical and technical fire direction was provided and supervised by Headquarters, 2d Battalion, 12th Marines.

b. Employment of artillery during the period 1 to 31 July 1967 consisted of 6701 high explosive, 125 white phosphorous, and 125 illumination rounds fired on targets of opportunity, unobserved missions, counter-mortar missions, and harassing and interdiction targets.

c. Additional long range fire support was provided by Company A, 3d Tank Battalion.

d. From 1-31 July 1967, the 81mm mortar platoon provided 8 tubes in support of 2d Battalion, 9th Marines. 400 high explosive, 400 illumination and 125 white phosphorous rounds were fired on targets of opportunity and counter-mortar missions.

e. During the period 1-31 July 1967, an extensive B&I program was carried out at all permanent and over-night positions.

f. Artillery support was satisfactory with the exception of coordination with air. Sufficient rounds were provided for all targets and speed was average. A better coordination plan for air and artillery should be worked out.

10. Air

a. Medevac. During July a total of 211 Marines were evacuated from the field. The normal quick reaction time provided by the UH-34 and CH-46 pilots enabled prompt evacuation of casualties from operating areas. During the time interval 28 July to 30 July 1967, these pilots braved intense enemy fire to medevac 120 battle casualties and some forty-five heat casualties.

b. Resupply. A total of eight supply lifts were flown to units operating in the field. These were all of emergency nature, and included ammo for all types of weapons in the battalion arsenal, water and medical supplies. The total weight lifted was 9,283 lbs.

c. Command and Control. A total of eleven reconnaissance missions were flown in support of the battalion. These missions were flown in the UH-1E, UH-34D and the O-1C. These flights enabled key battalion personnel an opportunity to view terrain before, during, and after operations. It was felt that the O-1C was the most satisfactory plane for this mission.

d. Troop Lifts. On 28 July, Fox company was lifted from (vic YD100692) to (vic YD081746). This lift included 3 CH-46, 3 UH-34D and 2 UH-1E plus a variety of fixed wing which prepared the LZ and also provided a smoke screen. A total of 152 combat troops were lifted. This operation was faultless in execution.

e. Fixed Wing. Various airborne FAC's continued to control air strikes in an outstanding manner. F-8's, F-4's and A-1's were utilized on 36 close air support missions. The accuracy of these strikes was excellent and accounted for 20 KBA (Conf) and 30 KBA (Prob). C-130's (Spooky's and "Dragon Ships") were also utilized with good results.

UNCLASSIFIEDS-4 Chronology

1. General. The logistical situation of this battalion is considered good. There are still problem areas in Supply, Motor Transport and Comm-Elect.

a. Supply. Significant shortages are (200) first aid kits, (83) wrist Watches, (727) poncho liners, (2900) green drawers, (445) Blankets, (247) air mattresses, and (250) entrenching tools with covers.

b. Ordnance. Currently the following is deadlined ordnance: (1) 81mm Sight, (1) M79 Grenade Launcher, (3) 45 Cal. Pistols, (1) 3.5 Rocket Launcher, (7) M16 Rifles, (1) M60 Machine Gun, (2) Flame Tanks, (1) 60mm Base Plate, (2) 60 mm Bipods, (1) Riot Dispenser Tank, (3) Shotguns, and (2) 106mm Mounts. Deadlined items are for repair or on order.

c. Motor Transport. At present we have no vehicles deadlined for 2d echelon maintenance. We currently have (11) Trucks Utility (M422A-1) operational, (6) are deadlined for R&R engines and (3) are Code X. Trailer, 1/2 ton (M416B-1), (19) are operational and (1) is Code X. Truck Platform (M274A-1), (23) are operational, (1) is deadlined for R&R engine and (16) are Code X. Truck, Cargo, 3/4 Ton (M37B-1), (3) are operational and (1) is on order. Difficulty is being experienced in obtaining suspension arm bearing units, long tie rods, rear wheel bearing and cups, and spark plugs.

d. Comm-Elect. Critical shortages for the AN/PRC-25 radio are (50) long antenna bases and modules, particularly A-9 and A-10. The modules have been on order since 2 May 1967. Antenna element AB-22 has been on order since 2 May 1967. This battalion is to receive (5) H-138 handsets per month, but to this date we have been receiving them with much irregularity. Shortages for the AN/PRC-47 are battery adapters which have been on order since 17 December 1966.

e. Supporting Units.

- (1) FLSU-1 provides the bulk of the logistical support.
- (2) EOD support is provided by FLSU-1.
- (3) Engineer support comes from the 3d Engineer Battalion.
- (4) Truck support is provided by the 9th Motor Transport Battalion and is coordinated through the 9th Marines S-4.
- (5) Helicopter support is received from MAG-16 and is coordinated through LSA-1 at Dong Ha for logistical lifts.

2. Camp Development. During this reporting period the battalion moved all administration sections from Cam Lo to Dong Ha. Since our arrival a shower unit has been installed and arrangement made with FLSU-1 for laundry service.

3. Operations. During this period the battalion has taken part in Operation Cimarron, Buffalo, Hickory II, and Kingfisher. The Battalion was also involved in moving the battalion admin from Cam Lo to Dong Ha and four (4) Companies with a Command Group to a position east of Con Thien.

4. Troop Movements. During this period, 69 trucks moved 1285 troops in 9 lifts.

5. Logistical Lifts.

a. During the reporting period, 1 helicopter moved 500 pounds of supplies in 1 lift.

Communications Chronology

1. General. The communications platoon furnished radio, wire, message center, repair and maintenance support for the battalion and all attached units during the month. The battalion has relocated and participated in four (4) major operations (Cimarron, Buffalo, Hickory II, Kingfisher). Electric power in the form of a 20KW generator was relinquished during the month and power is now supplied by the 11th Engineer Battalion.
2. Support. The communications platoon has supported as many as three (3) CP's at one time. The Battalion has supported 11th Engineer Battalion with one generator operator, the loan of sockets, plugs and cabling. The message center section has supported the rifle companies and the command group with courier service delivering spare parts, accessories, codes, and ciphers.
3. Telephonic Communications. The wire section of this battalion is maintaining two (2) command posts, one in the rear and one in the field. In the rear the section provides switchboard operation, wire maintenance, and servicing. In the field, the wire section provides telecommunications between the Battalion C.O. and the individual companies, plus assistance to the radio section in packing radio gear on the move. During the month of July the wire section lost five (5) men on rotation, bringing the wire section to two thirds strength. In the field the wire section also provides men for perimeter defense.
4. Training. There was no formal classroom instruction this month. Various members of the platoon were cross-trained in other specific fields of communications and for all practical purposes, transferred to other sections on a temporary basis. The schedule for training of company operators is being adhered to, even though most of them have completed it.
5. Operations. The battalion is now on Operation Kingfisher. A shortage of certain mos fields, I.E. radiomen and wire men, is being overcome. The platoon is supporting two (2) CP's with wire and repair facilities as well as radiomen and equipment. A vigorous campaign of preventive maintenance is now under way.
6. Difficulties. An acute shortage of modules and accessories for the radio set AN/FRC-25, and other equipment problems are increasing the attrition rates. Items have been on priority 2 in excess of ninety days. Maintenance at 3rd echelon or higher is too slow due to a lack of the same items.

ANNEX G

UNCLASSIFIEDMedical Chronology1. General

a. During the month of July the BAS personnel held military sick call for 563 Marine Corps personnel.

b. MEDCAP was not held.

2. Sanitation.

a. Routine sanitation of the battalion area was made by inspection on a daily basis.

b. Messing areas, latrines, and urinals were being sprayed with insecticide on a daily basis.

3. Disease, Injuries, Treatment in General

a. The BAS continues to maintain an eight bed ward for minor injuries. This ward enables the BAS to render more effective treatment. Personnel requiring more extensive treatment are referred to 3d Medical Battalion for hospitalization treatment, and for possible further evacuation.

b. Most of the patients treated at the BAS for the month of July were of a routine nature. There were no new cases of malaria. The battalion remains on a once weekly Primaquine and Chloroquine tablets as preventative against malaria, plus utilization of insect repellent and mosquito netting.

4. Casualties and Hospitalization. There were 180 personnel from the battalion hospitalized during the month of July. 84 were referred admissions to Medical Companies and 18 were BAS admissions. There were 28 KIA's and 312 WIA's during the month, all of which were a result of direct enemy action. Of those patients hospitalized: 14 cutaneous fungus infections, 2 hyperventilations, 5 diarrhea, 1 gastroenteritis, 3 fever unknown origin, 25 cellulitis, 25 contusion, and 2 crush injury.

5. Training. Informal discussions were held in the BAS by the Battalion Surgeon on Field Neurological Symptoms. Four Venereal diseases and personal hygiene lectures were conducted by BAS personnel.

6. Health and Service Records. Routine maintenance and immunization entries of health records was accomplished during the month. There were approximately 150 immunizations administered.

7. Compliment of BAS. At close of the month the BAS had a compliment of 1 Medical Officer and 61 Hospital Corpsman. There are 8 Petty Officers 1st Class attached to the BAS at this time. There were 18 Hospital Corpsman joined during the month, 11 transferred within the division and 3 transferred by PCS Orders.

8. There were no major problems during the month.

6. Supporting Forces.

a. Artillery and Armor

- (1) Battery "B", 1st Battalion, 13th Marines provided direct support (1-14 Jun).
- (2) Battery "F", 2nd Battalion, 12th Marines provided direct support (12 Jun-2 Jul).
- (3) Battery "K", 4th Battalion, 12th Marines provided general support.
- (4) 1st 8" Howitzer Battery provided general support.
- (5) Tactical and technical fire direction was provided by Hq., 2nd Battalion, 12th Marines.
- (6) Company "A", 3rd Tank Bn. provided additional long range fire support.
- (7) 1400 high explosive, 100 white phosphorous and 70 illumination rounds were fired on targets of opportunity, reconnaissance by fire, and counter-mortar missions. In addition 2756 rounds were fired on 1478 harassing and interdiction targets.
- (8) A counter-mortar plan for the Cam Lo artillery position was drawn up and employed once during the period 1 Jun - 2 Jul.
- (9) An intensive H&I program was carried out throughout Operation Cimarron.
- (10) Artillery support during Operation Cimarron can be considered fair. Volume of fire awarded to all missions was adequate but in many cases missions took 20-30 minutes for clearance.

b. Air Support.

- (1) Resupply. 4,500 pounds of ammo, water, and rations were flown to 2nd Battalion, 9th Marines during Operation Cimarron, utilizing H-34's flying 3 sorties. One mission was classified as an emergency and was requested on the FM TAR net. The remaining two were routine in nature, and therefore scheduled through Battalion S-4.
- (2) Medevacs. Twentyone marines and four civilians were evacuated, ranging from routine to emergency in nature. The medevacs were invaluable in getting marines prompt medical attention. Emergency requests were made directly to the DASC on the FM TAR net. Priority and routine requests were made on the same net to the regimental air officer. Reaction time was excellent in all cases.
- (3) Recon Flights. A total of seven recon flights were flown during Operation Cimarron. These flights provided invaluable information to key personnel in the Battalion. These flights were requested through the regimental air officer.

(4) Fixed Wing. Flights of emergency nature were requested directly to the DASC on the FM TAR net. Priority and routine requests were submitted through regiment. In all cases air controllers (airborne) were requested with fixed wing, and they were supplied by Army, Air Force, and Marine OI-C detachments. These spotter planes performed in an outstanding manner, as in one case bring airstrikes in as close as 100 meters from friendly troops. Aircraft used in Operation Cimarron were Marine A-1's, F-3's and F-4's. A wide range of ordnance was used including 20mm, 2.75 rockets, Zuni rockets, 250, 500, 1000, and 2000 pound bombs and ~~rockets~~. 1000 and 2000 pound bombs with delay fuses proved particularly effective against bunker complexes.

7. Intelligence

a. Enemy Disposition and Strength Prior to Operation Cimarron

(1) Due to the success of Operation Hickory all major NVA/VC units within the OA were driven out. Major units did exist north of the OA however but as this was not in this unit's OA they will not be discussed in this report. Small groups, units unidentified did exist throughout the OA but were no large threat to the mission of this unit.

b. Mission

The mission of these small groups, averaging 3-5 men was to harass friendly units. This was done by sniping, planting mines in areas used by friendly units, and planting booby traps. During this period (26) mines/booby traps were detonated by this unit and (21) mines/booby traps were ~~set~~ with 8 sniping incidents reported.

c. Activity

(1) During Operation Cimarron the NVA, badly beaten during Operation Hickory, fielded only small groups (3-5 men) with the mission of mining, booby trapping and harassing friendly units. During this period, only 3 sightings of more than 5 men and one engagement of over 5 men occurred.

(2) The fact that this was a major NVA staging area was confirmed during the operation by the number of base camps, bunkers, and caches discovered and destroyed.

(3) Mining of the MSR, a constant threat, was greatly reduced by aggressive patrolling and ambushing. Mines were found sporadically and daily roadswep was required.

d. Description of area of operation

(1) General. The area of operation is bounded on the north by the 69 east-west grid line. On the east by the 17 north-south grid line, on the south by a line generally along the 02 east-west grid line, and on the west by the 08 north-south grid line. The most prominent terrain feature within the OA is the MSR which splits the OA running north to south. The central portion of the OA is predominantly low rolling hills with piedmont type vegetation. The northern portion contains occasional deserted villages and rice paddies. The area on the western edge of the OA is slightly higher terrain and thickly vegetated. The eastern portion is also slightly higher, but the terrain is ~~predominantly~~ piedmont except in a few cases, primarily the lower areas (gulleys, valleys etc). The southern section contains occupied villages and cultivated farming land, primarily rice paddies.

(2) Cover and Concealment. In the farm lands cover and concealment is provided by hedgerows, ditches, and thickets, ranging from fair to excellent. In the northern and western sections of the OA the dense undergrowth provides concealment fair to good and good to excellent along the steep slopes of the hills.

(3) Critical Terrain Features. The most prominent terrain features in and around the operating area are Hill 158 at (YD 116701), the MSR running generally north and south through the operating area and the cleared strip running from Con Thien (YD116701) to Gio Linh (YD213732).

(4) Avenues of Approach. The entire area is interlaced with a good network of trails and roads. Movement through the entire OA is generally good to excellent.

(5) Weather. During Operation Cimarron, weather was generally hot; but never-the-less extremely good for operations throughout the OA. A weather summary for Operation Cimarron is as follows:

Maximum Temperature - 96
 Minimum Temperature - 74
 Number of days with rain - 6
 Total rainfall received - 2.31
 Average Winds 7-10 miles - S.W.
 Visibility - 10

(6) Civilian Population. Villages exist along the southern edge of the OA. The people are controlled by the Cam Lo Village Chief and are cooperative and friendly towards Marine units. Civilians exist in small isolated groups in the northern boundary of the operating area, most being persuaded by GVN authorities to leave this area. A few civilians were encountered, searched by this unit, and either sent to the rear for further interrogation, or released as appropriate. All were instructed by this unit that it is in their best interest to leave this area.

(7) Psychological Operations. Efforts in this area of operations were controlled and coordinated by the 9th Marines S-5.

8. Mission. 2nd Battalion, 9th Marines was given the mission to provide one rifle company as the Dong Ha Combat Base counterattack force; one company (rein) OpCon Gio Linh Cndr. for defense and security; assume OpCon of Marine elements of Combined Action Company in assigned OA; provide reinforcements, counterattack and relief force for Gio Linh artillery outpost and Cua Viet facility; maintain an active ground surveillance program and conduct spoiling attacks throughout assigned OA to detect and destroy infiltrating NVA personnel; provide security for route #9 and #1 within assigned OA. On 9 June 2nd Battalion, 9th Marines mission was changed to provide security for the forward artillery position at Cam Lo Vie (YD 117617), Cam Lo bridge site and provide security for route #561; maintain an active ground surveillance program and conduct spoiling attacks throughout assigned OA; provide counterattack force for the Cam Lo Resettlement Area.

9. Concept Of Operation. On 1 June 1967, 2nd Battalion, 9th Marines provided one rifle company (rein) OpCon to the 12th Marines for the defense and security of Gio Linh artillery position; provided one rifle company (rein) as counter-attack force for Dong Ha Combat Base during the hours of darkness; provided one platoon (rein) as Sparrow Hawk on 30 minute alert during daylight hours;

assumed OpCon of marine elements of Combined Action Company at Cam Lo, including CAC- P1, P2, P3 and P4; and provided security for route #9 in ZOA using CAC units and other assigned forces. Beginning 9 June 1967, 2nd Battalion, 9th Marines provided security for artillery positions located vic (YD147617); positioned forces along route #561 in ZOA to provide security for MSR and ford site vic (YD 136666) by aggressive patrolling along flanks; provided security for mine sweep team along route #561 (MSR) in ZOA; provided security for Cam Lo bridge site; provided security for truck convoys between vic (YD 145615) and Con Thien; controlled traffic on MSR between Con Thien and vic (YD 145615); provided security for 11th Engineer personnel and equipment while upgrading MSR; was prepared on order to provide relief/reinforcement of Gio Linh artillery outpost and Chu Viet Facility in the event of an enemy attack; conducted ground surveillance and spoiling attacks throughout assigned OA with assigned forces to detect and destroy infiltrating NVA forces; and was prepared to provide a platoon (rein) reaction force in the event Cam Lo Resettlement Village came under enemy attack. On 12 June the Battalion provided one rifle company (rein) as escort for a recon patrol to vic (YD080680) and established a patrol base until the return of the recon patrol, was prepared to provide relief/reinforcement of this escort force up to a Battalion-size force. On 29 June 1967 2nd Battalion, 9th Marines provided a Battalion CP group and two rifle companies to escort a recon patrol to the vic (YD 049686) to determine the status of a downed helicopter.

a. Supply and re-supply of all units attached to the Battalion was handled in the following manners.

(1) Resupply during the period in the Dong Ha Combat Base was no problem. Requests were passed from S-1 to supply officer for immediate action.

(2) Resupply while at Cam Lo was handled strictly by household trucks each day. Water needs were abundantly met by the water point at Cam Lo Bridge. The mess hall was in the field.

(3) Helicopters made re-supply on three separate occasions to companies on extended operations in the field.

(4) Difficulty was encountered in getting M-17 gas masks filters. A priority 2 request was sent by courier to Phu Bai to get them.

Treatment of Casualties, Evacuated and Hospitalization.

(1) The primary evacuation chain was from the field directly to "D" Medical Company, 3d Medical Battalion, located at Dong Ha.

(2) 2d Battalion, 9th Marines BAS was prepared to stand-by as a twenty-five bed holding ward in the event of "D" Medical Company overflow.

c. Medical Evaluation

(1) Most of the patients treated at the BAS for this operation were of a routine nature. There was 1 new case of malaria. The battalion remains on a once weekly primaquine and chloroquine tablet as a preventative against malaria.

(2) Diarrhea was found not to be a problem during this operation, due to a daily supply of potable drinking water being received.

13. Special Equipment and Techniques

a. Special Equipment

(1) TPS-21 Radar Set. One TPS-21 radar set was used on O.P. Hill #30 at the Cam Lo forward artillery position. The range of the TPS-21 was partially nullified by rolling terrain forward of the perimeter. However the TPS-21 was still very effective. Numerous sightings were made and artillery, 81mm and 60mm missions were fired in the vicinity of the sightings. There were no enemy casualties that were a direct result of TPS-21. The maintenance of the TPS-21 generator was not a problem due to the fact that several generators were available for rotation and maintenance.

(2) Seismic Intrusion Device. Three SID's were used for security of the Cam Lo forward artillery position. All seismometers were buried from three to six inches in the ground. One detected enemy movement outside the perimeter just prior to sniper rounds being fired from that vicinity. 60mm mortar fire was called with unknown results.

b. Techniques. To provide immediate action against convoy ambushes along route #561, artillery concentrations were planned at 1000 meter intervals on either side of the road. The OIC of the convoy security unit was given a sketch of the road and the numbered concentrations to be used in event of ambush.

14. Commanders Analysis.

Enemy movement was effectively interdicted in the Battalion OA. In addition it is felt the enemy was severely hurt by the large number bunkers and harboring sites destroyed and the amount of equipment and weapons destroyed or captured.

15. Recommendations.

It is recommended that tenant units of the Cam Lo forward artillery position man more of the perimeter. This would release an infantry company for patrolling the Battalion OA, thus enabling the battalion to cover the OA on either side of route #561 simultaneously.

(7) Company "A", 3rd Tank Bn., provided additional long range fire support (2-9 Jul.)

(8) 100 high explosive, 25 white phosphorous and 25 illumination rounds were fired on targets of opportunity, reconnaissance by fire missions. In addition 1980 rounds were fired on 750 harrasing and interdiction targets.

(9) A counter-mortar plan for the Cam Lo artillery position was in effect.

(10) An extensive H&I program was carried out throughout Operation Buffalo.

(11) Artillery support during Operation Buffalo can be considered satisfactory.

b. Air Support.

(1) Resupply. There were no resupply missions flown in support of Operation Buffalo.

(2) Medevacs. 35 Marines were evacuated, ranging from routine to emergency in nature. The medevacs were invaluable in getting marines prompt medical attention. Emergency requests were made directly to the DASC on the FM TAR net. Priority and routine requests were made on the same net to the regimental air officer. Reaction Time was excellent in all areas.

(3) Recon Flights. A total of 1 recon flight was flown during Operation Buffalo. This flight provided invaluable information to key personnel in the Battalion. This flight was requested through regimental air officer.

(4) Fixed Wing. Although there were numerous air strikes in the general operating area of the Battalion, none of these were either requested or controlled by the Battalion.

6. Intelligence

a. Enemy Disposition and Strength Prior to Operation Buffalo

(1) A constant build-up of personnel, supplies, and equipment has been taking place in the D.M.Z. since Operation Hickory. Sighting of Regimental size units were common. Major units are 812th Regiment 324B Division and 31st Regiment 341 Division. Both units are reinforced with artillery, rockets, tanks and SAM missiles.

b. Mission

The mission of these units was to attack and occupy the artillery position at Con Thien, destroy the bridge on the MSR located at Cam Lo (YD 148604), attack Dong Ha Combat Base and Con Thien with rockets and artillery. Also to employ specially trained units to conduct political agitation and propaganda using violence, assassinations, terrorism and sabotage.

c. Activity

(1) The enemy can and does conduct a highly effective H&I program on Con Thien and surrounding units. Even through his attack on Con Thien failed, there is no reason to believe that he won't try again.

(2) Mining of the MSR causes a constant threat to this Battalion overland resupply by the MSR.

DECLASSIFIED

d. Description of area of operation

(1) General. This Battalion's area of operation has been confined due to its mission as a blocking force. It is bounded on the north by the most prominent terrain features in the area, a cleared area known as "The Trace". The remainder of the area is predominantly low rolling hills with piedmont type vegetation, except for deserted villages and rice paddies to the south.

(2) Cover and Concealment. Concealment is provided by bamboo hedgerow ditches and thickets, ranging from fair to excellent. Cover was obtained by digging fighting holes and bunkers in the Battalion's position.

(3) Critical Terrain Features. The most prominent terrain feature in the area is "The Trace" running from Con Thien (YD 116701) to Gio Linh (YD 213732). The MSR running generally north and south from Con Thien to Cam Lo, is also a prominent feature.

(4) Avenues of Approach. The entire area is interlaced with a good network of roads and trails. Movement throughout the entire area is generally good to excellent.

(5) Weather. During Operation Buffalo, the weather was generally hot. A summary of the weather for Operation Buffalo is as follows:

Maximum Temperature - 100
 Minimum Temperature - 90
 Number of days with rain - None
 Total rainfall received - None
 Average Winds - 10-12 mph S.W.
 Visibility - 8-10 miles

(6) Civilian Population. The villages to the south have been deserted. However some civilians returned to their villages and when encountered were searched by this unit and sent to the rear for further interrogation. All were instructed by this unit that it is in their best interest to stay out of this area.

(7) Psychological Operations. Efforts in the area of operations were controlled and coordinated by the 9th Marines S-5.

7. Mission. 2nd Battalion, 9th Marines was given the mission to provide security for the forward artillery position at Cam Lo vic (YD 1147617), Cam Lo Bridge site and provide security for route #561; maintain an active ground surveillance program and conduct spoiling attacks throughout assigned OA; provide counter-attack force for the Cam Lo Resettlement Area. On 9 July, 2nd Battalion, 9th Marines mission was changed to relieve 3rd Battalion, 9th Marines and on order attack in assigned zone to locate and destroy enemy forces, supplies and equipment.

8. Concept of Operation. 2nd Battalion, 9th Marines provided security for artillery position located vic (YD 1147617); positioned forces along route #561 in ZOA to provide security for MSR and ford site vic (YD 136666) by aggressive patrolling along flanks; provided security for mine sweep team along route #561 (MSR) in ZOA; provided security for Cam Lo bridge site, provided security for convoys between vic (YD 1145615) and Con Thien; controlled traffic on MSR between Con Thien and vic (YD 1145615); conducted ground surveillance and spoiling attacks throughout assigned OA with assigned forces to detect and destroy infiltrating NVA forces; and provide a platoon (rein) reaction force in the event Cam Lo Resettlement Area came under attack. On 9 July, 2nd Battalion, 9th Marines assumed 3rd Battalion, 9th Marines mission and conducted a daylight relief in place over a two day period that was completed on 10 July 1967. 2nd Battalion, 9th Marines established a perimeter vic (YD 133702) and conducted aggressive patrolling and ambushes in ZOA.

DECLASSIFIED

b. Treatment of Casualties Evacuated and Hospitalization.

- (1) During Operation Buffalo the casualty evacuation chain was directly through "D" Company, Third Medical Battalion, located in Dong Ha.
- (2) From 2 July through 9 July the B.A.S. of 2nd Battalion, 9th Marines was prepared to serve as a standby medical holding facility with a capacity of about 20 patients. From 10 July until the termination of the Operation, the B.A.S. was prepared to give emergency treatment and supervise further evacuation of casualties, but no holding facilities were set up.

c. Medical Evaluation.

- (1) Adequate sanitation was maintained by strict regulation of the disposal of refuse and excrement.
- (2) The supply of potable drinking water has been sufficient.
- (3) Skin infections were minimal, and have not been a problem.
- (4) Serious foot problems have been almost non-existent.
- (5) Diarrhea and heat exhaustion have been minimal due to the adequate supply of potable water and liberal use of salt supplements.
- (6) No major medical problems or unusual medical problems were encountered during this operation.

12. Special Equipment and Techniques.

a. Special Equipment

(1) TPS-21 Radar Set. One TPS-21 radar set was used on COP Hill #30 at the Cam Lo forward artillery position. The range of the TPS-21 was partially hindered by the rolling terrain forward of the perimeter. The maintenance of the TPS-21 became a problem when a vacuum tube became inoperable and could not be replaced. The vacuum tube was placed on a priority request.

(2) Seismic Intrusion Device. Three SID's were used for security of the Cam Lo forward artillery position and two were used for security of the Battalion perimeter during Operation Buffalo. All seismometers were buried from three to six inches in the ground. No enemy movement was recorded during Operation Buffalo by the SID's.

b. Techniques. To provide immediate action against convoy ambushes along route #561, artillery concentrations were planned at 100 meters intervals on either side of the road. The convoy commander was given a sketch of route #561 and the numbered concentrations to be used in event of ambush.

13. Commanders Analysis.

Through aggressive patrolling and ambushing along the MSR and company size operations in the Battalion ZOA the mission of the Battalion to keep the MSR open was carried out very successfully.

14. Recommendations.

Continue to control the ZOA through aggressive patrolling and conduct company size sweeps along flanks of the MSR.

6. Intelligence

a. Enemy Disposition and Strength prior to Operation Hickory II

Following Operation Buffalo, it appeared that the large NVA units, present during the operation, had moved north across the Ben Hai River, to regroup due to heavy losses in personnel and equipment on Operation Buffalo. Major units still posing a threat are the 812th Regiment 324B Division, and the 31st Regiment 341st Division. Both units are reinforced with artillery, rockets, and SAM missiles. Sighting of large units did not occur, but small OP and LP units were spotted north of the cleared area, "The Trace".

b. Mission

The mission of these small units was to observe movement and activity of friendly units, and attempt infiltration through the front line troops to gain potential rocket and mortar sites for shelling the Dong Ha Combat Base and the forward artillery outpost at Con Thien, Gio Linh, and Cam Lo. They also were to conduct propaganda rallies and political agitation in an effort to swing the civilian populace in favor of their programs.

c. Activity

(1) The enemy conducted his highly effective H&I program at the forward artillery outpost at Con Thien.

(2) Enemy LP's and OP's were present almost every evening on the northern border of "The Trace" in an effort to determine the movement and intentions of friendly units.

(3) The enemy continued his mining operations in the MSR, with six incidents reported. In all cases the mines were located by Engineer sweep teams and detonated in place.

d. Description of the area of operation

(1) General. This Battalion's area of operation has been limited due to its mission as a blocking force. It is bounded to the north by the most prominent terrain feature in the area, a cleared area known as "The Trace". The remainder of the area to the south, east, and west is predominantly an agricultural area, with many low rolling hills, and compartments bordered by thick hedgerows and treelines. There are several deserted villages to the south and east.

(2) Cover and Concealment. Concealment is provided by bamboo hedgerows and other thickets of heavy vines. Concealment, in general ranges from good to excellent. Cover was obtained by the construction of fighting holes and covered bunkers on the Battalion's position.

(3) Critical Terrain Features. The most prominent terrain feature in the area is "The Trace" running from Con Thien (YD 116701) to Gio Linh (YD 213732). The MSR running north and south from Con Thien to Cam Lo.

(4) Avenues of Approach. The entire area is interlaced with a good network of roads and trails. Movement throughout the entire area is generally good to excellent.

(5) Weather. During Hickory II, the weather was generally hot. A summary of the weather for Hickory II is as follows:

Maximum Temperature - 97
 Minimum Temperature - 78
 Number of days with rain - None
 Average winds - 11-13 miles SW
 Visibility - 15-20 miles
