after the first week. All rockets came from the west-northwest. Heavy counter rocket fire was fired on all known and suspected positions. There were 2 incidents of mortar attacks on VCB in mid July. All rounds landed well outside the perimeter. Artillery and fixed wing were brought to bear on the enemy position, after which infantry units were sent into the area. No further incidents occurred.

6. Logistics.

The motor transport situation remained satisfactory throughout the month of July, with a 12% deadline rate at the end of the reporting period. Nine of the thirteen vehicles deadlined required second echelon repair.

The ordnance situation was satisfactory, with no major problem areas in the evacuation and repair of ordnance equipment.

All nets were VHF/FM. Directional antennas (AS-2236) or elevated ground plane antennas (RC-292) were used, depending on the specific requirements of each net. Regimental FSCC circuits were maintained by double remoting FDC radios. During the 4th Marines move to their
