COMMAND CHRONOLOGY
1 March 1966 - 31 March 1966
RICHARD R. MILLER
Commanding Officer

I. Narrative Summary of Significant Events.

MACS-7 and Detachment Alpha controllers conducted 916 flight followings, 119 GCI/GCA handoffs, and identified and reported 1651 friendly tracks during March 1966. The increased number of flight followings reported by Detachment Alpha (334) is attributed mainly to work connected with TPQ-10 bombing runs and to the large number of Army aircraft in the Hue Phu Bai area. Throughout the month of March the air defense system of Chu Lai was exercised by MACS-7 controllers controlling 116 faker runs for HAWK (2nd LAAMBn.) engagement. MAG-12 aircraft were used. There were no practice ground controlled intercepts conducted during the month because all available aircraft were used for ground support missions. During the past quarter 114 practice intercepts have been conducted and minimum established requirements call for 660 per quarter. One third of these may be completed with simulating equipment, however the AN/SPS-T2A has been deadlined for parts in excess of 10 months.

An additional radome section for the AN/TPS-34 arrived on 17 March. The radome was erected the following day. To successfully operate the AN/TPS-34, all that is necessary now is the arrival of the air processing unit component and liquid coolant pump, which have been on order since 20 Oct 65 and 9 Dec 65 respectively.

The AN/TPS-37 site built with an extensive dirt fill and concrete pad construction was completed and the system erected on 25 March. At the present time it is in the process of being aligned.

The AN/TPS-22 is inoperable pending arrival of antenna base sections on order. The system radiated for a total of 11.2 hours during the month.

Camp construction is in a continuing state of improvement. A new Butler Building has been completed this month. It will house the Tactical Air Operations Center and Communication/Electronics Section. An area for a new messhall has been cleared and construction of the galley has begun. The new messhall will accommodate 250 men. The Squadron's internal defense has been enhanced by the improvement of defense bunkers and alternate positions.

Concerning the squadron's Civil Affairs Program, 108 Vietnamese civilians were given minor medical treatment during March by MACS-7 Corpsmen. Most of these people were from the village of Trung Toan and Xoun Trung. Forty pounds of clothing and 24 bars of soap were also passed out to children from local villages.
